

COVID-19: Screening Questionnaire

Mission

WYMD establishes guidelines to Army and Air Leadership that ensures service member safety during this COVID-19 pandemic.

Commanders Intent

Army and Air leaders are able to develop a return to duty plan based on clearly established guidelines. This will allow for simultaneously ensuring readiness and mission success to be addressed internally and approved by the TAG.

General Guidance

The Medical Working Group recommends the following COVID-19 illness screening questions to be completed 24-hours prior to reporting to duty:

Do you currently have any of the following:

- Fever (100.4 Fahrenheit or higher) or feeling feverish?
- Chills?
- A new or worsening cough not caused by another health condition?
- New or worsening difficulty breathing not caused by another health condition?
- Sore throat?
- New or worsening muscle aches not caused by another health condition?
- New or worsening headache that is not normal for you and not caused by another health condition?
- New loss of sense of taste or smell?

In the last 14 days, have you had close contact (within 6 feet) with anyone with a positive, known or suspected COVID-19 infection?

Are you awaiting a COVID-19 test result?

If the answers to any of these questions is “yes,” then the service member should not come to work and must contact their supervisor for guidance (see flow chart).
